

Patient with a Regular Card

You have been given a "Regular Patient Card" to enable you to have tests performed on a regular basis (daily, weekly, monthly etc). Please bring this card to the Collection Room with you as it contains all the necessary information required to collect and process your specimen/s.

Please note the following:

- You must take this card **to all Doctor's appointments** (GP or hospital) so that any necessary changes can be made.
- Your identification details will be checked **each time you attend** a collection room.
- Unless you are going to work early, or the tests require you to be "Fasting", lengthy waits can be avoided by attending a collection room after **9.00am**.

Tests requiring "same day" results (e.g. INR tests):

Test results will be sent to your doctor in the afternoon. If you attend **before 11.00am**, your results will be back with your doctor the same afternoon.

If you have any queries, our Collection Room Staff will be able to assist.
